

South African Journal of Science and Technology

WHY WOULD YOU SELECT THE SATNT AS JOURNAL?

The SATNT has a proud history of almost 100 years. Research results from the natural sciences and technology published over this period not only helped in strengthening South Africa's international research status, but also contributed to greater academic and public prosperity within South Africa. The SATNT would like to build on this proud tradition. Therefore, the SATNT invites all Afrikaans-speaking researchers, as well as other-language researchers, to publish their research results in the SATNT, and in doing so to benefit from the exposure that the SATNT offers to authors.

All research articles published in the SATNT qualify for a subsidy from the Department of Higher Education and Training (DHET) at the university or research institution to which the authors are affiliated.

WE ELEVATE YOUR RESEARCH TO NEW HEIGHTS

The SATNT strives to publish articles of outstanding quality that relate to South African natural science and technology, and therefore proudly offers students and researchers a home in which they can fulfill the scientific method with integrity to its full extent through the course of their research.

WE SUPPORT AFRIKAANS AND RECOGNISE MULTILINGUALISM

The SATNT offers Afrikaans-speaking scientists the opportunity to publish their research results in their own mother tongue. In addition, the SATNT also invites other language researchers to submit manuscripts in English, which will also be translated into Afrikaans after acceptance. Through this, the SATNT not only succeeds in maintaining and further expanding the Afrikaans natural scientific and related technological subject language, but also in promoting multilingualism.

WE PROVIDE WORLDWIDE EXPOSURE

The SATNT represents an open-access peer-reviewed science journal in which South African research results can be published for global exposure. Each article is stored immediately after publication in the SATNT archives of the following bibliographic databases: DHET SA List, Thomson Reuters Web of Science Other Coverage, BIOSIS Previews, Directory of Open Access Journals (DOAJ), EBSCO Host, GALE, CENGAGE Learning, Google Scholar, ProQuest, Norwegian Register for Science Journals, Series and Publishers, Level 1, Portico, Medpharm Library, SA ePublications, Sabinet, South African Government Libraries.
